Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1625

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 8-9, and 12-18, the term “a hydrocarbon” is recited. The expression is vague and indefinite because the specification does not elaborate what is meant by the term “hydrocarbon”. The term “hydrocarbon” may mean that a compound consisting of carbon and hydrogen, but there are numerous hydrocarbons known in the organic chemistry; there is uncertainty as to what kind of “hydrocarbon” can be applied for the process. The examiner recommends to add the carbon range for the hydrocarbon. Therefore, an appropriate correction is required.

In claims 8-18, the phrase “propene contains propane” is recited. The expression is vague and indefinite because the term “contains” would mean that there are some additional components, such as propane besides the single propene; the skilled artisan in the art is unable to figure out what else is present in the propene in addition to propane; therefore, the examiner recommends to change from the single propene compound to the propene mixture. Therefore, an appropriate correction is required.
